Policy on Career Reviews

A Career Review is an assessment of a candidate's achievements over the course of the candidate's entire career. Career review files should include evidence of achievement since appointment or the previous career review.

A career review is conducted during all promotions, advancement to Step VI and to Above Scale (Professor and comparable series).

To insure a thorough evaluation by referees and reviewers, it is important that candidates format their C.V. to reflect the accomplishments they wish to have evaluated.
